The Research Team,
Department of Mathematics,
Faculty of Science,
University of Peradeniya,

LETTER OF APPRECIATION

The Lanka Responsible Care Council (LRCC) extends its heartfelt appreciation to the following group of third-year undergraduate students from the Faculty of Science, University of Peradeniya, reading for a B.Sc. Degree in Statistics and Operations Research, for their outstanding contribution to the project titled: "Optimization Model for Waste Processing Location in BOI Zones in Sri Lanka."

Team Members:

S20801 – K.A. Sachethana Abeyrathne
S20810 – S.P. Gayathri Bandara
S20821 – E.U.M.A.N. Ekanayake
S20825 – K.G. Chanya Gamage
S20826 – R.G.J. Nilanka Gamage
S20830 – K.P. Sakuna Himal
S20841 – T.T. Asini S. Karunarathna
S20863 – P.V. Kavindu Sachintha

Through their diligent work, the team has successfully applied Operations Research and Optimization Techniques, specifically the Single Facility Location Model combined with the L-BFGS-B algorithm implemented in Python, to propose a scientifically sound solution for determining the optimal location of a centralized waste processing facility across BOI industrial zones. The LRCC recognizes the team's strong analytical skills, innovative approach, and commitment to sustainable development. Their research provides an important framework for improving the efficiency of industrial waste collection and recycling systems in Sri Lanka, aligning with the Council's vision of promoting responsible care and environmental stewardship within the industrial sector.

We are pleased with the professionalism and enthusiasm shown throughout the study and believe that this work lays a valuable foundation for future collaborations aimed at developing national-level optimization solutions for industrial waste management.

The LRCC congratulates the entire team for their successful completion of the project and expresses its sincere appreciation for their contribution to advancing sustainable industrial practices in Sri Lanka.

Thank you

Your Faithfully

Lakmini Edirisinha, PhD
Chief Executive Officer
Lanka Responsible Care Council, Sri Lanka
